ABOUT NETWORK-1 TECHNOLOGIES, INC.

Network-1 Technologies, Inc. is engaged in the development, licensing and protection of its intellectual property and proprietary technologies. Network-1 works with inventors and patent owners to assist in the development and monetization of their patented technologies. Network-1 currently owns thirty-three (33) patents covering various telecommunications and data networking technologies as well as technologies relating to document stream operating systems and the identification of media content. As a result of the acquisition of its Mirror Worlds Patent Portfolio in May 2013, Network-1 achieved licensing and other revenue of \$47,150,000 through September 30, 2016 with respect to its Mirror Worlds Patent Portfolio.
