Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter).

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Item 8.01 Other Events.

On January 8, 2020, Network-1 Technologies, Inc. (the “Company”) announced that the U.S. Patent and Trademark Office issued U.S. Patent No. 10,530,575 (Systems and Methods for “Machine-to-Machine” (M2M) Communications Between Modules, Servers, and an Application using Public Key Infrastructure (PKI)) and U.S. Patent No. 10,523,432 (Power Management and Security for Wireless Modules in “Machine-to-Machine” Communications). The claims in the newly issued patents are generally directed towards methods of communication between Machine-to-Machine modules and servers. The newly issued patents arise from a patent application contained in the M2M/IoT Patent Portfolio acquired by the Company in December 2017. With this latest issuance, the M2M/IoT Patent Portfolio now includes twenty-six (26) issued U.S. patents and six (6) pending U.S. patent applications, plus seven (7) additional pending non-U.S. patent applications. A copy of the press release is attached hereto as Exhibit 99.1.

Additionally, on January 8, 2020, the Company announced that the U.S. Patent and Trademark Office issued U.S. Patent No. 10,521,470 (“Methods For Using Extracted Features To Perform An Action Associated With Selected Identified Image”) and U.S. Patent No. 10,521,471 (“Methods For Using Extracted Features To Perform An Action Associated With Selected Identified Image”). The claims of the newly issued patents are generally directed towards methods of content extraction and identification, including performance of actions following therefrom. The newly issued patents arise from a patent application contained in the Cox Patent Portfolio acquired by the Company from Professor Ingemar Cox in 2013. Since the acquisition of the Cox Patent Portfolio, the Company has filed thirty-four (34) additional patent applications, thirty (30) of which have been issued bringing the total Cox Patent Portfolio of granted patents to thirty-five (35). A copy of the press release is attached hereto as Exhibit 99.2.

Item 9.01 Financial Statements and Exhibits.

(d) Exhibits

<u>Exhibit No.</u>	<u>Description</u>
99.1	Press Release dated January 7, 2020
99.2	Press Release dated January 8, 2020

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

NETWORK-1 TECHNOLOGIES, INC.

Dated: January 9, 2020

By: /s/ Corey M. Horowitz
Name: Corey M. Horowitz
Title: Chairman & Chief Executive Officer

FOR IMMEDIATE RELEASE

**Network-1 Receives Two New Patents from U.S. Patent Office Expanding
Its M2M/IoT Patent Portfolio To Include 26 Issued Patents**

New York, New York – January 7, 2020 – Network-1 Technologies, Inc. (NYSE AMERICAN: NTIP), a company engaged in the development, licensing and protection of intellectual property, announced today that the U.S. Patent and Trademark Office issued U.S. Patent No. 10,530,575 (Systems and Methods for “Machine-to-Machine” (M2M) Communications Between Modules, Servers, and an Application using Public Key Infrastructure (PKI)) and U.S. Patent No. 10,523,432 (Power Management and Security for Wireless Modules in “Machine-to-Machine” Communications). The claims in the newly issued patents are generally directed towards methods of communication between Machine-to-Machine modules and servers.

The newly issued patents arise from a patent application contained in the M2M/IoT patent portfolio acquired by Network-1 in December 2017 (the “M2M/IoT Patent Portfolio”). The M2M/IoT Patent Portfolio relates to, among other things, the enabling technology for authenticating and using embedded SIM cards in next generation IoT, Machine-to-Machine, and other mobile devices, including smartphones, tablets and computers as well as automobiles. With this latest issuance, the M2M/IoT Patent Portfolio now includes twenty-six (26) issued U.S. patents and six (6) pending U.S. patent applications, plus seven (7) additional pending non-U.S. patent applications. Network-1 anticipates further issuances of additional claims for the M2M/IoT Patent Portfolio.

ABOUT NETWORK-1 TECHNOLOGIES, INC.

Network-1 Technologies, Inc. is engaged in the development, licensing and protection of its intellectual property and proprietary technologies. Network-1 works with inventors and patent owners to assist in the development and monetization of their patented technologies. Network-1 currently owns seventy-seven (77) patents covering various telecommunications and data networking technologies as well as technologies relating to document stream operating systems and the identification of media content. Network-1's current strategy includes continuing to pursue licensing opportunities for its Remote Power Patent and its efforts to monetize three patent portfolios (the Cox, Mirror Worlds and M2M/IoT Patent Portfolios). Network-1's strategy is to focus on acquiring and investing in high quality patents which management believes have the potential to generate significant licensing opportunities as Network-1 has achieved with respect to its Remote Power Patent and Mirror Worlds Patent Portfolio. Network-1's Remote Power Patent has generated licensing revenue in excess of \$145,000,000 from May 2007 through September 30, 2019. Network-1 has achieved licensing and other revenue of \$47,150,000 through September 30, 2019 with respect to its Mirror Worlds Patent Portfolio.

This release contains forward-looking statements within the meaning of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. These statements address future events and conditions concerning Network-1's business plans. Such statements are subject to a number of risk factors and uncertainties as disclosed in the Network-1's Annual Report on Form 10-K for the year ended December 31, 2018 filed with the Securities and Exchange Commission, including, among others, the continued material adverse effect on Network-1's business, results of operation and cash-flow if the District Court order confirming the HP jury verdict finding of non-infringement is not reversed by the Federal Circuit Court of Appeals, the risk that Network-1 will not receive in the future material royalty revenue from licensees of its Remote Power Patent, the uncertainty of Network-1's revenue stream, the ability of Network-1 to successfully execute its strategy to acquire or make investments in high quality patents with significant licensing opportunities, Network-1's ability to achieve revenue and profits from its Cox Patent Portfolio, its M2M/IoT Patent Portfolio and additional revenue and profit from its Mirror Worlds Patent Portfolio as well as a return on its investment in IliAD Biotechnologies, LLC or other intellectual property it may acquire or finance in the future, the ability of Network-1 to enter into additional license agreements, uncertainty as to whether cash dividends will continue be paid, the uncertainty of patent litigation and proceedings at the United States Patent and Trademark Office, the difficulty in Network-1 verifying royalty amounts owed to it by its licensees, Network-1's ability to enter into strategic relationships with third parties to license or otherwise monetize their intellectual property, the risk in the future of Network-1 being classified as a Personal Holding Company, future economic conditions and technology changes and legislative, regulatory and competitive developments. Except as otherwise required to be disclosed in periodic reports, Network-1 expressly disclaims any future obligation or undertaking to update or revise any forward-looking statement contained herein.

FOR IMMEDIATE RELEASE

**Network-1 Receives Two New Patents from U.S. Patent Office Expanding
Its Cox Portfolio To Include 35 Issued Patents**

New York, New York – January 8, 2020 – Network-1 Technologies, Inc. (NYSE AMERICAN: NTIP), a company engaged in the development, licensing and protection of intellectual property, announced today that the U.S. Patent and Trademark Office issued U.S. Patent No. 10,521,470 (“Methods For Using Extracted Features To Perform An Action Associated With Selected Identified Image”) and U.S. Patent No. 10,521,471 (“Methods For Using Extracted Features To Perform An Action Associated With Selected Identified Image”). The claims of the newly issued patents are generally directed towards methods of content extraction and identification, including performance of actions following therefrom.

The newly issued patents arise from a patent application contained in the patent portfolio acquired by Network-1 from Professor Ingemar Cox in 2013 (the “Cox Patent Portfolio”). The Cox Patent Portfolio includes patents relating to enabling technology for identifying media content, such as music and videos, and taking further actions to be performed based on such identification including, among others, the insertion of advertisements and the facilitation of the purchase of goods and services relating to the media content. Since the acquisition of the Cox Patent Portfolio, Network-1 has filed thirty-four (34) additional patent applications, thirty (30) of which have been issued bringing the total Cox Patent Portfolio of granted patents to thirty-five (35). Four (4) applications relating to the original specification are still pending and Network-1 anticipates further issuances of additional claims for its Cox Patent Portfolio.

On April 4, 2014 and December 3, 2014, Network-1 initiated litigation against Google Inc. (“Google”) and YouTube, LLC (“YouTube”) in the U.S. District Court for the Southern District of New York for infringement of several patents within its Cox Patent Portfolio. The lawsuit alleges that Google and YouTube have infringed and continue to infringe the asserted patents by making, using, selling and offering to sell unlicensed systems and related products and services, which include YouTube’s Content ID system.

Network-1’s litigations against Google and YouTube were subject to court ordered stays which were in effect from July 2, 2015 until January 2, 2019 as a result of proceedings at the Patent Trial and Appeal Board (PTAB) and related appeals. Pursuant to a Joint Stipulation and Order Regarding Lifting of Stays, entered on January 2, 2019, the parties agreed, among other things, that the stays with respect to the litigations were lifted and discovery is proceeding.
